About This Game

Drive as fast as possible on infinite procedural roads. You'll need the best reflexes to beat the 90° turns and the spectacular road patterns. Be a superstar and take risks by making awesome acrobatic tricks. Surpass yourself and challenge your friends on the online dedicated speed and score leaderboards.

Hyperun is a mix of driving skills, endurance, style and gravity defying roads.

Features
• The game is going really really fast.
• Speed and Score international leaderboards.
• Learn from the best by watching the replay of any leaderboard entry.
• Advanced vehicle customization.
• Colorblind-friendly colors
• Instant pleasure: smooth and reactive user experience, no loadings.
• Procedural tracks. Every race is unique.
• Extreme motorcycle tricks for spectacular driving.

Important note: Please be aware that due to the fast pace of Hyperun, objects may quickly flash on screen. Anyone with a history of photosensitive epileptic seizures please do not purchase or play this title as it may potentially lead to seizures.

Title: Hyperun
Genre: Indie, Racing, Sports
Developer:
Concrete Games
Publisher:
Concrete Games
Release Date: 11 Jul, 2017

 a09c17d780

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7

Processor: Intel Core i3-4160 @ 3.60GHz

Memory: 4 GB RAM

Graphics: Intel HD 4000 or equivalent

DirectX: Version 10

Network: Broadband Internet connection

Storage: 1 GB available space

English,French,German,Japanese,Korean,Russian,Simplified Chinese

Awesome.
Love the new mechanics.. and the alternate history is awesome aswel.

well done.. Runs well on the computer! It brings me back to the times that I played this game on my Xbox360. I picked this up on sale for $1.70, because the plot seemed intriguing and the price was low enough that it seemed worth the risk. Unfortunately, I ended up with a game so frustrating to try to operate that I gave up after 25 minutes. For some reason, the game is very, very laggy on my Linux desktop, and the controls are clunky as all get-out. Minor things like trying to scroll through my quest log to remind myself what I was supposed to do were extraordinarily difficult. Speech bubbles always appeared with no text in them, and I'd have to click a second time to see any words. Trying to pick up items had the feel of trying to get a stuffed toy out of a coin-operated claw machine.

Even aside from the clunkiness, I found the game itself rather confusing, too. Explanations did pop up as I had my character try to interact with things, but I must've completely missed something with the combat, because I could not manage to get through a single battle without my monster getting killed off. On the other hand, I'd managed to trigger so many explanation dialogs about crafting that it overwhelmed me.

There seems to be a lot of stuff in this game that I didn't really get to, so I wouldn't say that it's totally without merit. Clearly a lot of work went into the game, However, the severe performance issues made me unwilling to get past that early-game "argh I don't know where to go or how to do anything" hurdle. It also concerns me that after eight updates in the first month after release, this game has seen no updates (or even communication) since April… this suggests that the developers have already walked away. Maybe they'll be back, I don't know, but as it is I cannot recommend this game, even for $1.70.. What are you doing step-bro.. I've played many construction simulation games. This is the first one that is a great balance of simulation and arcade-like fun. The reason for playing construction games is because my sons love construction trucks. The other simulators are tedious and time consuming (partly because its simulation-focused). Demo and Build 2017 is the first game where the kids are engaged throughout the game play.

A few things I'm (and my sons) are looking forward to is to have more vehicles and attachments/extensions for those vehicles. For me, it would be great if they added a gamepad (xbox controller) support.

Overall, this is a fun construction game. Great for adults and kids.. quot;YOU

THE
S P A C E
H O L E"

I enjoyed this game a lot. I also really like how you need to move your sphere along a thin course in order to either reset data, or

get an achievement.

There's hints of Super Monkey Ball in here, with some interestingly designed courses and an above average soundtrack. Controls are a little finnicky, but the addition of controller support is welcome.

Honestly, I went in with low expectations, expecting a sub-par unity asset hell experience, but in the long run, I enjoyed the game, and had myself a really nice time.

https://www.youtube.com/watch?v=YpfYJO9P7NA. When I first opened this game to record for my YouTube channel, I expected a game that would try to scare me out of my pants like a grenade exploded between my legs. When I got to playing it, it left me with a sense of terrified awe and disturbed wonder, almost like a religious experience.

There's a lot of people who say this has a Lovecraftian atmosphere to it. I wholeheartedly agree. Sinking to the very depths of sanity and reality, you become aware that the horror isn't in facing demons, zombies, nor jumpscares. No, the true horror comes from being absolutely helpless to do anything to save yourself as you sink further into the abyss.

If you have VR like Oculus, I HIGHLY recommend you use it for this game. Not saying that playing this off monitor takes nothing away from the atmosphere, but this game would probably be best suited for VR.

This game is short, but it's also well worth the money. My hat goes off to you, Alpha Wave. A splended job on blowing away my mind!. i like the game well the start i havant really played it yep but please step up the main charaters voice acting anyway its a good scary game!!!. Hallucination my♥♥♥♥♥♥♥♥♥tards. First choose your club name kit design then your journey to management glory begins and glory has to be earned!! no choosing a big club with a massive budget here your succcess will be determind by judging players skills choosing the formation then going up against your fellow managers There is a great choice of which FA you join so you can decide which time suits you best for playing your games so you can get the most out of being online at the right time to get the most from the game . I think 90MF has alot to offer for the PRICE and believe the DEV team are on the right track taking the game forward..And the huge bonus you get is you cannot be fired!!! no players complain they are not in the first team unlike other games LOL!! I have no problem in reccomending this game as long as you are prepared to put the time and effort in to defining your own success and dont expect perfection because nothing in life is ever really perfect is it? Buy this today and enjoy!

Very fun party game. I love watching people try to ski.. Too hip for Tetris?
Well, you probably haven't ever heard of Fractal.. We love playing this as a family! They now added the ability for the person sitting in front of the computer not on the vive to interact with the environment as well, fun times :). It's a very good train simulator Much work still needs to be done on translating from the German text used in the simulator to English. Tried to buy some tools from the EEP Shopping website, but the Click and Buy merchant app continued to state that my password was weak and would not let me proceed although it had already taken my credit card details. According to reviews on the Net of Click and Buy, which I subsequently read, I will need to monitor my bank account very closely from now on.

The 10.1 patch has not yet been released in the English version although it has been out in German for a while.

I imported a very large layout to act as a guide for laying my own track. The size of the imported bmp file limited the number of pixels I that could specify, which resulted in a very grainy, unusable template. In today's age of 64-bit computing and virtual RAM, this limitation seems needless.

In conclusion - a purchase that should have been postponed until the quality of the software and support of the English version is equal to that of the original.. Combines a poker-style card game with Puzzle Quest battles. There's a quest, but you can skip all the dialogue and just get on with the game. It's not that challenging, but it's entertaining.. TLVDR This is crazy, it's very challenging and it's good. Will ruin your friendships in co-op.

This is not your average bullet hell game.

The best way to describe it would be a crazy mix of Ikaruga and classic shooters like Gradius, Xenon or R-Type
So the amount of bullets is normally not a problem but the environment and the two dimensions is where the challenge lies. And what a challenge, if you like hardcore stuff this game will make your brain explode!

Co-op is fun but bring a friend that can play or you are going to ruin your friendship.. I've found this maze game very enjoyable! Casual interface and control that even a child can understand it.
Cute images and folk music makes a pleasant impression. It's good that there is some hint of a plot that makes you take a fancy to John.
Message to developers - put some more music tracks.
At conclusion this brainteaser seems like a legit timekiller that gives you positive emotions while you drink warm tea with some cookies x). Fantastic and easy to use. This DLC is the digital version of the Zombicide base game. Scenarios and tokens snap to the board with an easy click. All scenarios in the base game are ready to launch, no assembly of tiles required (unless you build your custom campaigns). If you're scared of dropping $60-100 on the physical copy, you can't go wrong with the price here. A must own if you're a fan of zombicide.. quot;Dannazionne!" this is one fantastic game!

Mind you, this is more of a sci-fi noir game, there will be a few twists towards the middle that will have you doing a double-take. But trust me, the game is pretty good for what it is.

It's a little slow to start and it's difficult to grasp the story at times since there are so many characters and side stories to keep track of and there are intervals throughout the game that calls for 'rewinds' and 'fast forwards' in time to portray other perspectives.
However, what sets this game apart from other noir-themed games, is that this is a point & click game - which means it's going to be story heavy and less on the action side, which I personally enjoyed; also, you will be able to pick locks and solve puzzles (some of which can be maddening at times, but they're a delightful addition).
You do get to interview various characters and while there aren't necessarily any consequences for your choices, you might miss out on some details of the story if you don't ask the questions in a certain way or if you're too rough.

My outlook on the game is mostly positive but I do have a few complaints.

There are a few plot holes, things that aren't explained; and, there's a cliffhanger at the end that leaves room for a supposed sequel - and I do hope that it is completed and released soon because I want to know more about the story!
And, it's a bit frustrating that you have the option to skip lock-picking if it's too challenging, but you can't skip puzzles - I felt that option should've been balanced.

If you're like me and craving the noir genre, I do recommend this game.. An all around unremarkable game. Story doesn't really go anywhere. The few characters you interact with feel extremely generic. The hidden object scenes and the puzzles are ok, albeit a good amount of them is recycled from other games. From a game called Demon Hunter I would expect some demon hunting or something, but you are really just running around combining objects to get to the next location with very little story to motivate it or provide context.

Not a horrible game, just rather lackluster overall.

Into Oblivion - Version 1.4.4 Update:
Hey, anonymous alcoholics! The hits keep coming. This time there is a small patch to fix a few persistent glitches... finally.

Here's the fancy-ass change log to show you what:

- Fixed: version number issue

- Fixed: issue where betting higher than bot has causes crash

- Fixed: issue where wrong colored eyelids showed for bot

. **Version 1.5 is live!**:
We added a new song for levels 36 to 39 and simplified the help tips in the build and level menus.

Have a look at the full patch notes in the forum!. **Demo update 2.05**:
We're focusing on the full version, so there won't be many changes to the demo from now on unless it's a patch with additional contents.

Complete changelog:. **Little Surprise**:
As already announced in the last patch. Today you can find the little surprise ingame.

We wish you a merry christmas!

Greetz DigitalWolfByte. **Patch - 4th October 2017**:

List of changes:. 　　　　　:

遊戲更新，角色調整

即將到來的更新將大幅改變角色的成長系統，引入職業系統。
另外，副裝備系統也會有所調整。

20181025日，更新. **Upcoming updates and changes to the characters**:
Hello everyone!
I wanted to announce that I'm going to heavily update and change character progression system in upcoming update. I was thinking about it for a long time, because I don't think that current system offers much variety and depth in gameplay options, and I want to improve this.

In short, I want to implement class system, with 3 classes at start, with a whole lot of new abilities and talents, unique for each class. I don't want these classes to be similiar to other tactical games, like xcom, so they will be pretty unique, atleast I hope they will. I also design them to have different synergies between each other.

I also want to change secondary equipments system, take the most useful things like grenades, medkits and couple more to class abilities, remove all other items that are not used very much, and make equipment an instrument of tuning out stats of your characters.

Anyway, I will tell all in detail, when the update will be ready, I hope to get it ready next week.

Thank you for your support!

New thematic aMAZE - Game will be available soon)

Patch 26 - Info Panels - v0.6.3 Changelog:
Today we finally released a feature many people asked in the last weeks: the Info Panels!

It is now possible to click on most in-game entities to learn more about what's happening in the restaurant! That will allow all you chefs to better tune your restaurant and increase your profits!

We also balanced late game contents and fixed a couple issues!

Changelog

- **Added Info Panels: players can now click on in-game entities to learn more about their stats and what they are doing.**

- Improved the visual effects on tools in use and made them closely reflect the actual number of slots used.

- Balanced staff salaries.

- Balanced tools' slots.

- Reduced the Popularity needed to unlock Popularity Events.

- Balanced the cost of all tools.

- Fixed the Summary Panels showing some erroneous data.

. **Check Out Super Rad Raygun!**:
